

Drug Supply Chain Security Act (DSCSA)

The #1 Goal of DSCSA is Patient Safety by:

Decreasing the volume of counterfeit product in the supply chain

Improving the ability to track and recall product

Efficiently manage product supply to avoid shortages.

The Road to Interoperability

An integrated one scan solution, though not part of the law, is a critical step toward automation and interoperability.

If you are already scanning or planning to scan incoming product, InfiniTrak can integrate with your Pharmacy Management or Warehouse Management system to maximize your work flow efficiency.

Current Compliance Requirements

1. Validate trading partner licenses with every transaction
2. Reconcile & store transaction data for 6 years
3. Investigate & quarantine suspect product
4. Notify FDA & trading partners of illegitimate product
5. Respond within 48 hours to regulatory audits

Compliance Through November 27, 2023

6. Only accept product that has a unique product identifier
7. Written policies & procedures for handling suspect & illegitimate product
8. Verification of product at the package level
9. Electronic data exchange capabilities
